

**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, MAY 26, 2005 – 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Initial attack activity was light nationally with ??? new fires reported. Three new large fires were reported, two in the Southwest and one in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, New Mexico, and Texas.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

VALLE, Santa Fe National Forest. This fire is eight miles west of Los Alamos, NM in mixed conifer. Short uphill runs with group torching were observed.

MESA CAMINO, Santa Fe National Forest. This fire is six miles southwest of Coyote, NM in ponderosa pine. No new information was received.

SKUNK, Arizona State. This fire is 20 miles southwest of Globe, AZ in chaparral. A Type 2 Incident Management Team (Philbin) is assigned. Increased acreage is due to more accurate mapping.

SHINER, Arizona State. This fire is ten miles west of Kingman, AZ in desert scrub and grass. Minimal spotting was reported.

NUKE, Arizona State. This fire is ten miles southwest of Tonopah, AZ in grass and chaparral. Flare-ups in heavier fuels in drainages were observed. No new information was reported. This will be the last report unless new information is received.

**SOUTHERN AREA INCIDENTS/LARGE FIRES:**

MITRE PEAK-KING MTN., Texas Forest Service. This fire is ten miles northwest of Alpine, TX in brush, oak and grass. Backing fire was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
MITRE PEAK-KING MTN.	TX	TXS	3,200	60	5/26	87	2	7	2	0	NR

## OUTLOOK:

**Weather Discussion:** High pressure will be firmly in control of western weather today. Temperatures will warm with no threat of rain showers or thunderstorms. The exception will be across eastern New Mexico and southeast Colorado, where a backdoor cold front will enter into the area late this afternoon. Thunderstorms are expected over the northeast quadrant of New Mexico and southeast Colorado, with some dry thunderstorms possible towards the north central part of New Mexico.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b>  Partly to mostly sunny and hot with a few mountain thunderstorms, otherwise turning cooler with a chance of thunderstorms northeast NM and TX panhandle.	60s to mid 80s mountains, northeast NM and TX panhandle. 80s to near 107 remainder.	5 to 20%, except 20 to 40%+ northeast NM and TX panhandle.	W to SW 10 to 15 mph with gusts to 20 to 25 mph AZ and western NM, becoming NE 10 to 20 mph eastern NM and west TX.
<b>Southern California</b>  Areas of morning low clouds and fog in coastal basins. Isolated thunderstorms Sierra Crest and eastward, otherwise sunny.	75 to 90 mountains. 80 to 90 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	10 to 25%.	Southwest to northwest 5 to 15 mph.

### **HELICOPTER LANDING AREA SAFETY**

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter.
- Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.
- When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.
- Always approach and depart an operating helicopter on the downhill side.
- Remove or secure loose articles when working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
